

NEWTON NYAMOSI OPERA

Cybersecurity & Cloud Security Professional

+254 718 413 890 | nyamosiopera@gmail.com | <https://www.linkedin.com/in/nyamosi-opera-565bba3a5>

PROFESSIONAL SUMMARY

Google-certified Cybersecurity and Cloud Security Professional with a solid foundation in ICT. Proven track record in securing local network infrastructure, building automated reporting pipelines, and applying defensive security frameworks. Technically proficient in Python automation, cloud security fundamentals, Linux environment administration, and vulnerability management. Equipped with practical capstone validation in deploying foundational cloud access controls and logging configurations. Reduced user-configuration errors by 35% through targeted security awareness training.

PROFESSIONAL CERTIFICATIONS

Google Cloud Security Professional Certificate & Capstone – June 2026

Core Competencies: Cloud security architecture, Identity and Access Management (IAM) controls, and cloud infrastructure defense policies.

Google Cybersecurity Professional Certificate – June 2026

Core Competencies: SIEM tools (Splunk/Chronicle), intrusion detection systems (IDS), Python scripting, Linux, SQL, and threat mitigation.

Google IT Support Professional Certificate – October 2024

Core Competencies: Operating systems, network protocols, troubleshooting, and system administration fundamentals.

TECHNICAL SKILLS MATRIX

- Security Frameworks: Threat Modeling, Vulnerability Mitigation, Cloud IAM Policy Management
- Security Tools: SIEM Environments (Splunk, Chronicle), Intrusion Detection Systems (IDS), Port Scanning/Sockets, Wireshark, Nmap
- Core Systems: Linux Terminal, Microsoft Windows Server, Local Area Networks (LAN) Architecture
- Languages & Automation: Python, SQL, Linux Shell (Bash), SMTP Email Automation, HTML5/CSS3, JavaScript

TECHNICAL PROJECTS

Cloud & Network Infrastructure Security Capstone – *Google Cloud*

- Evaluated cloud architectures to determine access management vectors, hardening parameters, and identity frameworks.
- Configured cloud identity policies and established secure parameters to mitigate infrastructure vulnerabilities.

Automated Job Scraper & SMTP Auto-Notifier – *Python / GitHub Actions*

- Architected a serverless Python script on GitHub Actions to securely scrape and monitor external job environments on a 6-hour schedule.
- Integrated Python's smtplib and email modules to automatically parse new listings and send real-time email alerts directly to inbox.
- Deployed environment variable handling using encrypted GitHub Secrets to securely mask email login credentials and API keys.

Lightweight Concurrent Port Scanner – *Network Security Tool*

- Programmed a concurrent multi-threaded Python TCP/IP port scanner analyzing up to 100 threads simultaneously.
- Implemented custom socket timeout configurations, dynamic hostname resolution matrices, and robust error handling.

WORK EXPERIENCE

IT Support Specialist / Social Media Infrastructure Lead

Immanuel AGC, Sotik – Jan 2023 – Present

- **System & Network Hardening:** Administer and secure local IT infrastructure and network configurations, maintaining 99.9% uptime for critical organizational systems.
- **Security Awareness Training:** Designed and delivered security workshops for staff and volunteers, reducing user-configuration errors by approximately 35% and promoting secure software practices.
- **Data Resilience & Governance:** Established a robust backup verification pipeline to guarantee high data availability, integrity, and swift disaster recovery capabilities.

IT Support & Data Verification Intern

Kericho County Referral Hospital – Jan 2021 – Apr 2021

- **Network Infrastructure & Diagnostics:** Configured IP addressing architectures, terminated Ethernet connections, and ran network stability tests to ensure optimal performance.
- **System Optimization:** Diagnosed LAN disruptions, isolated systemic hardware faults, and managed systems installations to optimize hospital operational uptime.
- **Database Integrity & Auditing:** Inputted and audited over 1,200+ critical electronic patient records, enforcing internal verification parameters to preserve database integrity and strict compliance.

Freelance Front-End Developer

Sotik Environments / Local Contracts – Jan 2024 – Feb 2024

- Built responsive, clean web interfaces using front-end technologies (HTML5, CSS3, and JavaScript) to optimize user experience and cross-browser accessibility.

EDUCATION

Diploma in Information Communication Technology (ICT) – Graduated

Mathenge Technical Training Institute

- Academic Performance: Credit (Distinction in Module III)
- Supplemental Training: Responsive Web Design (2023), Fundamentals of Networking (2022), Basics of Ethical Hacking (2023)
